music maker 2004 Deluxe

Experience the music. Make the music.

MAGIX music maker 2004 Deluxe is the comprehensive music creativity software to record, mix and master your own music and create your own music videos. . **MAGIX music maker 2004 deluxe** let's you become the musician, producer, director, remixer and D.J. to create your own music, soundtracks, and music videos in minutes. Impress your family and friends by emailing them your first song, or publish it to the Internet. **MAGIX music maker 2004 Deluxe** provides the tools—simply add your own talent and creativity.

Make music • Arrange • Create Videos • Present

The dual-mode interface makes it easy for beginners and more advanced users. Simply preview the sounds during playback and drag them into your project. Preconfigured arrangements are available to help you get started.

Make Music

There are high quality sound loops to suit any taste or directly record your own vocals and live instruments, including Techno/Trance, Hip-Hop, New Rock, Disco House, Strictly 80´s, Easy Listening/New Jazz.

Create your own grooves and melodies with the included Beat Box, Drum & Bass Machine, Scratch Box, and a host of synthesizers. Play live – one VSTi™ plugin instrument per track.
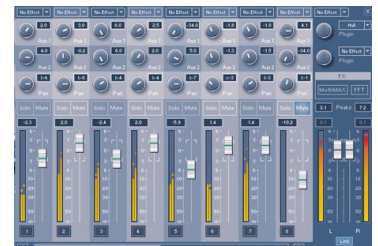

Edit & Apply Effects

Import and edit MIDI files and apply realtime effects. Use the automatic remix function to divide CD or MP3 originals into segments that can be timed to the beat.
Filter out the original vocals and add karaoke lyrics or your own vocals.

Mix & Master

The easy-to-use mixer adds the final touch: Cut automatically, re-sequence, and add beats to get the exact sound you want.

Produce Music Videos

You've got your song; now make your own music video. The integrated video controller makes it easy to add your own clips and sounds, create custom special effects, apply rhythm-controlled visual effects (the image moves to the beat!), and add configurable moving text.

Publish

Share your creation. The integrated templates make it easy to select a design, insert your music, videos and text and publish to your own website.
